

FALMOUTH / **FLEXIBLE**
UNIVERSITY LEARNING

DEVELOPMENT PRACTICE WEEK 7

Rapid Ideation Session 2

LEARNING OUTCOMES (WEEK 7)

- 1) Prepare for the second rapid ideation session.
- 2) Explain the need for version control.
- 3) Describe version control systems.
- 4) Set up a version control repository for your rapid ideation artefact.

THINGS TO CONSIDER 1/3

From CANVAS:

- Did everything go according to plan?
- If anything, what went wrong?
- Is there a way you could build on your work from the first session?

THINGS TO CONSIDER 2/3

What do you want to get out of this activity?

The artefact you choose to develop should take the form of something that is aligned with your goals...

- A completed app/game/tool prototype?
- An experiment of different ways to approach a design?
- A better understanding of the tools?
- Insight into your skill levels?
- Discerning the gaps in your knowledge?

THINGS TO CONSIDER 3/3

Challenge yourself

- You are encouraged to leave your comfort zone
- Dive into the activity head first.
- Aim to produce an **interactive artefact**

You are not assessed on the quality of the end product. Rather:

1. Quality of your reflection(s) and
2. The direction you will undertake following the RI activity.

GO TO WIKIPEDIA TO
CHECK A SINGLE FACT

REALIZE 3 HOURS LATER YOU KNOW
EVERYTHING ABOUT THE SOVIET UNION

RI ACTIVITY

Firstly, go to the Wikipedia website and cycle through random articles until you have:

1. A person
2. A location
3. Some form of event that had/will take place

NOTE: You may cycle through the random articles as long as you wish

The screenshot shows the Wikipedia homepage. The 'Random article' link in the left sidebar is highlighted with a blue arrow. The main content area displays the article for 'George Bedbrook', including a table of contents and the 'Personal' section.

Personal [\[edit \]](#)

Bedbrook was born on 8 November 1921 in [Melbourne, Victoria](#), with whom he had two sons and three daughters. He died o

RI THEME

Using your three articles – in the broadest sense possible – consider the following theme...

“As long as we have each other, we will never run out of problems.”

GGJ 2009; <https://globalgamejam.org/history>

RI EXAMPLE

My three articles...

Angell Park Speedway has a 1/3 mile (0.54 km) dirt racetrack located in Sun Prairie, Wisconsin.

Spain participated in the Eurovision Song Contest 2014 in Copenhagen, Denmark.

Dr Norman Kingwell Day (born 25 March 1947, in Melbourne, Australia) is an architect, educator, and writer.

RI EXAMPLE

Analysis of articles...

Angell Park Speedway – Driving

Spain participated in the Eurovision Song Contest 2014 – Mass participation

Dr Norman Kingwell Day – Australia

RI EXAMPLE

Analysis of articles...

Angell Park Speedway – An app featured around driving

Spain participated in the Eurovision Song Contest 2014 – Something lots of people may use at once

Dr Norman Kingwell Day – Re. Australia, something of importance/relevance to a particular country

RI EXAMPLE — EVACUATION APP

Background

Australia recently ravaged by bushfires, inflicting a devastating blow to their environment, wildlife and community.

Many people evacuated suddenly.

Key findings revealed many roads closed/blocked without warning

Concept

An emergency app used to notify others of (for example) sudden road closures when attempting to evacuate

In the event a road is closed, users (e.g. from their location) can issue alerts/warnings which is updated in real time

Help direct others to safer routes

RI EXAMPLE — EVACUATION APP

Disclaimer

No market research conducted

Did not consider commercial aspect

Existing apps/services may already exist

Approached this idea for development practice

ANY QUESTIONS?

Do consider working in pairs

- For example, a UX designer pair with a programmer or
- A pair made up of individual specialisms

Refer to the articles in the broadest sense possible

- Search through the text
- You may decide to use any combination of the articles
- You can also treat them literally (e.g. a karaoke racing game set in the Australian outback)

Practice presenting the final artefact (for eventual show and tell)

You may use any variation of the RI Evacuation App example

Your aim should be to create a physical, interactive piece

- App, interactive wireframe, game, website, web app, etc.
